#### **DETAILED ACTION**

Page 2

#### Preliminary matter

Examiner's immediate supervisor has instructed examination such that claims must not rely on imported description/specification in an internal Office electronic mail messages dated August 8, 2006 and August 2, 2006 to the examiner. Claims must contain all specification discussion as clarified by examiner's supervisor. Furthermore, language such as "to expose," "to directly contact," or "for directing" is to be interpreted as desired result and ordered examination such that the invention should be claimed as means or step plus function format, based on an internal Office electronic mail message dated July 10, 2006. The rejections to follow are based on mandated polices by examiner's immediate supervisor, with contact information at the end of this action.

#### Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat.

App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 5-7 recite the broad recitation aligned or arranged, and the claims also recite parallel or about a centre which is the narrower statement of the range/limitation.

Claims 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Those claims are construed as indefinite because each contain a narrow recitation within a broad recitation.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (c) he has abandoned the invention.

The independently claimed invention is construed as being in a Jepson format since the "characterized in the" provision is interpreted as a phrase such as "wherein the improvement comprises" because applicant's preamble preceding that recitation is

Application/Control Number: 10/520,393

Art Unit: 3749

either found in the prior art or applicant assignee's other patented or patent applied inventions.

Claims 1-2 and 5-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gerlach et al. (US 2004/0025368).

Claims 1-7 are rejected under 35 U.S.C. 102(c) because the invention has been abandoned. Assignee's earlier patent application 10/465,170 claims the same invention as recited in the current pending claimed invention. That abandoned application is considered to bar patenting of the current claimed invention under section c of this statute.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gerlach in view of van der Merwe (US 5,843,030). Gerlach is considered to disclose

Art Unit: 3749

the claimed invention, as rejected above, except for the claimed projected ribs reservoir charging conduits. van der Merwe, another device using reservoir charging conduits, is considered to disclose projected ribs at column 7 lines 16-62. It would have been obvious to one skilled in the art to combine the teachings of Gerlach with the projected ribs, considered disclosed in van der Merwe for the purpose of structurally defining an optimum configuration in charging conduits. Furthermore Gerlach in view of van der Merwe is considered to disclose the claimed invention, except for the corresponding peaks and troughs charging conduit arrangement. It would have been an obvious matter of design choice to provide a specific conduit arrangement since the teachings of Gerlach in view of van der Merwe perform the invention as claimed regardless of the type of conduit arrangement.

#### **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 3749

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 7,065,903.

Assignee's earlier patent claims flexible portions instead of the claimed charging conduits. It would have been obvious to one skilled in the art to recite the currently claimed charging conduits instead of the patented flexible portions since both features perform substantially the same function, in substantially the same way using substantially the same means for substantially the same result.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ehud Gartenberg can be reached on 571 272 4828. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
